

Why take two when one will do?

By shaking your hands a bit and using only **one paper towel** instead of two, you will not only be saving the school money, but you will be reducing our carbon footprint! Fewer trees will need to be cut down, less fossil fuel will need to be burned to deliver paper towels, and there will be less waste taking up space in landfills.

Brought to you by Mr. Dunkin's 7th Grade Human Impact Project 2012.
